

CS 203 Computing and Algorithms III

Your responsibilities for an excellent experience for yourself and your classmates

Recall that upon our discussion on the first day of the class, we talked about our responsibilities for a good learning experience. I am listing these, so that we can go back and look at it once in a while, if we end up in frustrating or difficult situations.

This is the responsibility of each student:

1. I will make an attempt to attend all classes and labs.
2. I will meet Prof. Kanchi every two weeks during the scheduled time, and let her know how is the class experience for me and discuss if anything needs to be done differently.
3. I will bring the class notes, textbook and a watch (or another device) to keep time.
4. I will willingly participate class activities, including discussions, going to the board to solve a problem.
5. If I miss a class or a lab, I will call my friend whose phone number I already have and get as much info as possible.
6. I will make a plan on turning in the homework on time (even week Mondays)
7. I will make every effort to turn in my assignments on time (odd weeks Wednesday midnights)
8. If I am frustrated with a problem/ work assigned I have the right and responsibility to contact Prof Kanchi immediately for help. If she does not respond to email within the time I like, I will call her on her cell phone, but I need to move forward with my work.
9. I have right to ask any question in class, as long as the question, furthers my knowledge and helps me move ahead in the learning.
10. I will not distract the class unnecessarily by talking to my classmates. If I am tuned out, I will not disturb others.
11. I will check my grades often and find out how I am doing in the class.
12. If I am some trouble, outside class and I cannot fulfill my responsibilities I will inform Prof. Kanchi as soon as possible.

(This is all I could think of right now... hopefully these are more than enough to keep us going smoothly)
